TECHNICAL SKILLS

- **Programming**
Java, C, C++, Python
- **Web Development**
HTML 5, CSS3, JavaScript, PHP
- **Framework**
React.js, Spring-Boot, Vite.js, Tailwindcss, Next.js
- **Mobile Application Development**
Android Studio, Kotlin
- **Database**
MongoDB, MySQL, SQLite
- **Cloud Platforms**
GCP, AWS
- **Version Control**
Git

SKILLS

Javascript (intermediate)
React js (intermediate)
Next js (beginner)
Python(beginner)
Java(intermediate)
Kotlin (beginner)
SQL (beginner)
C++ (beginner)
C (beginner)

SOFT SKILLS

1. Decision making
2. Leadership
3. Team Player
4. Time Management
5. Logical thinking
6. Adaptability

SUMMARY

Motivated and detail-oriented IT undergraduate with a strong foundation in programming and a passion for solving real-world problems through innovative solutions. A quick learner and collaborative team player, eager to apply technical skills and creativity to contribute to impactful projects during an internship role.

EDUCATION

- | | |
|---|------------------|
| BSc (Hons) Information Technology
Sri Lanka Institute of Information Technology (SLIIT) | 2022-2026 |
| G.C.E A/L & G.C.E O/L
St.Sebastian's Central College Katuneriya | 2017-2020 |

EXPERIENCE

- Software Engineer Intern - Phrasecode**
Mar 2025 – May 2025
Remote work

PROJECTS

- Agriculture System** **2025**
Developed a Land Development System using React and Konva as part of a university project. The system features interactive land boundary drawing, real-time area and distance calculations, and automated tree placement with growth simulation. Included tools for environmental analysis, buffer zone management, and export/import functionality to support accurate agricultural planning and visualization.

Technologies used - MongoDB, Express.js, Node.js, React.js, Postman

- Vehicle Service Management System** **2024**
Developed Mr. Automotive, a Vehicle Service Management System using the MERN stack, as part of a university project. The system includes responsive search functionality, automated report generation, and email notification features. Conducted comprehensive API testing with Postman and implemented unit testing using Jest and the React Testing Library to ensure robust functionality and optimal performance.

Technologies used - MongoDB, Express.js, Node.js, React.js, Postman

- Task Management App** **2024**
Developed a mobile app enabling users to manage their special notes efficiently through CRUD operations, allowing them to save, edit, view, and delete reminders. The app also features a timer functionality, providing users the ability to start, stop, and restart timers seamlessly.

Technologies used - Kotlin, Room Database
